Eun Ho Koh

eunho03.github.io

Undergraduate Student, UNIST
Computer Science and Engineering
GitHub | ehko030715@unist.ac.kr

EDUCATION

UNIST Mar 2022 - Present
B.S. in Computer Science and Engineering (in progress)
Coursework: Data Structures (A-), Database Systems (A-), Mobile Computing (A0).

RESEARCH INTERESTS

Data-driven modeling and prediction; efficient AI inference and routing; LLM-based agent systems.

RESEARCH EXPERIENCE

Data Mining Lab, UNIST Apr - Oct 2026
AICP Research Participant | Advisor: Prof. Junghoon Kim
- Graph rewiring for community detection; co-authored a research poster.
  Artificial Intelligence Challengers Program (AICP).

AI-CORE Lab, UNIST Jun - Aug 2026
Reinforcement Learning Research Intern | Advisor: Prof. YoungSoo Jang
- Organized an intern textbook study group; completed the planned half of the textbook.

Korea Workers' Compensation & Welfare Service Apr - Jul 2026
Collaborative Research Participant
- Participated in insurance enrollment prediction experiments using subscriber data.

PROJECTS

Hyundai Motor Group In-Vehicle App Development Challenge Oct 2026 - Present

Deep Learning Course Project Sep 2026 - Present

K-AI Manufacturing Data Analysis Competition Sep - Oct 2026
- Applied EDA, external data substitution, and feature expansion to improve the baseline.

BATT-Route: Battery-aware Routing for Mobile LLM Services Mar - Jun 2026
Mobile Computing | Four-member team | Course research report co-author
- Reviewed and presented three research papers; studied battery-aware edge-cloud routing.
- Team prototype: Android, Qwen3-14B, Gemini 2.5 Flash; accuracy, latency, and battery evaluation.

HONORS

Student Merit Award (Team Award), UNIST Sep 2026
Team recognition for service through CSE Supporters, the CSE Student Council.

First Place, Student Startup Competition, KAIST May 2023
Five-member team | Awarded by the Director of the KAIST Center for Entrepreneurship.

LEADERSHIP & SERVICE

Member, CSE Supporters, UNIST Mar 2026 - Present
- Organized the creation of UNIST's first CSE department jacket.

President, UNIST Startup Bible (USB)
- Formalized the existing organization through nonprofit registration.
- Secured KRW 8 million through Ulsan's 2023 Youth Community Revitalization Program.
- Launched Refresh, USB's first recurring ideathon, in March 2023.

SKILLS & LANGUAGES

Machine learning: Supervised learning, model training and evaluation; exploratory data analysis.
Programming: Python, C/C++, Kotlin, SQL, MATLAB | **Tools:** Git, Docker, Android Studio, LaTeX
English: G-TELP Level 2: 77 (Sep 2026).

MILITARY SERVICE

Sergeant (Discharged), Republic of Korea Army Sep 2023 - Mar 2025
1st Special Forces Brigade (Airborne).
